

SIZING GUIDE!

SMALL

When choosing which size bag to make for your laptop, please do NOT go by the manufacturers specified laptop sizing as this is referring to the screen size and NOT the overall size of the laptop which includes casing etc. Please use the measurements given here as a guide to choosing.

Some Notes: You may get away with a width or depth that is slightly larger than those given. If your laptop is less than 5cm (2") deep then you may fit a laptop that is slightly larger in width. For example, my laptop measures W 26.7cm (10 1/2"), H 42cm (16 1/2"), D 3.5cm (1 3/8"), Diagonal 48cm (19") and fits nicely in the large size.

However if all your measurements are close to and one is larger than the sizes given, the bag may be a tight fit so if you are considering choosing one of the smaller sizes, you may need to make the next size up!

MEDIUM

LARGE
